Arvind partners with Textile Genesis for block-chain based track & traceability initiative

Arvind Limited, the \$1.5 billion textile to technology conglomerate and the largest manufacturer of denims in India, announced its collaboration with Textile Genesis™ a block-chain enabled digital transparency platform for apparel supply chain. This collaboration will address the emerging need for Transparency across the complete Denim supply chain, backed by a credible Traceability mechanism.

This platform will provide complete traceability of cotton and other inputs being used by Arvind to the customers. This technology works closely with a network of key sustainable fibre suppliers helping create a sustainable ecosystem for major brands and retailers. Arvind Denim's wide range of sustainable offerings like single-origin non-conflict cotton Renaissance range of recycled cotton, polyester and other fibres; will be available with full track & trace.

"At Arvind Denim, it is our constant endeavour to bring the latest in design and innovation to our key partners/customers backed with a promise of sustainability. This is yet another step in that direction. We are elated to embrace this new technology which will prove impactful in coming times."

- Aamir Akhtar, CEO, Lifestyle Fabrics - Denim, Arvind Limited

"Sustainability and Traceability are really two sides of the same coin, and great to see Arvind taking a lead on both fronts. Our supply chain traceability platform will create end-to-end traceability for Arvind's innovative and sustainable products across the entire supply chain using Fibercoins™ traceability technology" says Mr. Amit Gautam, CEO & Founder of TextileGenesis. Path breaking digital "Fibercoins™" technology from TEXTILE GENESIS, allows brand and retailers full value chain traceability and visibility along with ESG (environmental, social and governance) credentials of the Supply Chain Partners from fiber-origin to retail.
